
Bard: Urological Division

Take Control

More confidence. Less limitations. The QuickLink® Delivery System offers the ultimate in connected seed versatility, providing an efficient mechanism to create any 0.5cm custom loading configuration. Because it incorporates Bard’s proprietary SourceLink® Connectors, the seed trains maintain their intended spacing and position after implant, delivering radiation right where you want it.

QuickLink® Delivery System Cartridges

Control

Time

No counting. No handling. The QuickLink® Delivery System is cartridge-based and the dial-and-dispense mechanism is fast and intuitive. Seeds, links and spacers are already loaded in cartridges, limiting handling exposure. Easy-to-read indicators let you know how many seeds or links remain in each cartridge. The dial-and-dispense system makes linked seed trains fast and simple to create.

Finally, QuickLink® System cartridges are delivered sterile, requiring less preparation time.

No automation. No glitches. The QuickLink® Delivery System is fully manual, putting you in control. The cartridge and dial-and-dispense system allows you to remain very connected to the process—and enables each link and seed to be added to the current train with the simple push of a button.

In addition, the proprietary SourceLink® Connector design allows you to easily alter configurations to meet a changing plan.

Finally, because there is no handling of individual seeds with the QuickLink® Delivery System, radioactive exposure is minimized.
Prostate Cancer

Control Outcome

More targeted treatment. Better results. The QuickLink® Delivery System brings linked brachytherapy to a new frontier. Dynamic, fast, intuitive, and versatile, the QuickLink® Delivery System opens the door to true, real-time linked brachytherapy. Plan, build the train, and implant. All in the OR. All in one efficient session.
“Control Freak” is not an insult

Offer your patients the most advanced brachytherapy treatment. The QuickLink® Delivery System brings together connected sources with real-time planning opportunities. It’s the best of both worlds.

Introducing The Bard QuickLink® Delivery System. A new approach to linked brachytherapy.

The QuickLink® Delivery System makes building custom seed trains quick, simple, and safe. Quick enough to make real-time linked brachytherapy a viable option.

The QuickLink® Delivery System delivers you the ultimate in brachytherapy control. Fully hands-on, mechanical, intuitive, and simple to use. This is a brachytherapy revolution. Faster. More efficient. Easier to create.

Take Control.

The QuickLink® Delivery System delivers the benefits of a connected implant with the advantages of real-time planning:

• Simple and intuitive for efficient loading
• Creates custom needle loads with variable spacing
• Requires no handling of individual seeds
• Allows easy verification of seed and link configurations
• For use only with SourceLink® Connectors
